

UA PRINT SUPPLIER PROGRAM

UA Print Supplier Program

UA Procurement and Contracting Services has created a Print Supplier Program to help all units on campus save time and money on printing services. Ten printing companies are part of this program and each has been evaluated by UA Printing Services (UAPS) and judged to be superior for printing quality, customer service, prepress expertise, ability to meet deadlines and price. Volume discounts are built into our contracts with these vendors. The more UA departments use these selected vendors, the greater the discount each department will receive.

How the program works:

When a department needs a printer, that unit can contact one or more of the contracted print vendors directly for a quote. If a unit would like the UAPS to assist, we can help obtain quotes and place the order. Some units like to manage this process themselves: Others prefer to rely on the expertise in UAPS.

One real benefit to using a printer through this program is that no matter how much you are spending on printing, there is no need for an RFP. And the unit paying for the printing has the authority to choose the print vendor.

Once the print vendor has been selected, a copy of the awarded estimate along with an interdepartmental billing form (IBF) should be faxed to UAPS at 621-6478. The unit then works directly with the print vendor to process the printing job. UAPS will issue a PO to the printer for billing. The printer invoices UAPS, which bills the department and pays the vendor.

The price that's quoted by the printer (plus tax) is the price that's charged to your account. The vendors pay a 2% administrative fee to the University for streamlining this process for them. It's that simple.

This program is administered through the UA Printing Services (UAPS) department located at 220 West 6th Street, Room A525. If you have questions, please call Karen Campasano.
